VIVAHA ATELIER

LUXURY WEDDING INVITATION MARKETING SITE

UI/UX & Design System

Colour, type, layout and components for the Vivaha Atelier interface.

Document Vivaha-UX-001

Version v1.0

Author Irham Saleha

Prepared for Vivaha Atelier project documentation

1. PRINCIPLE

The product is the decoration. The interface stays quiet: generous whitespace, restrained type, and no ornament competing with the invitation photography.

2. COLOUR

Token	Use
Ivory ground	Page background, so photography carries the colour.
Ink	Headings and body copy.
Metallic accent	Dividers, active navigation and the enquiry call to action only.

3. TYPE

- A display serif for section headings, echoing invitation typography without imitating it.
- A quiet sans for navigation, forms and anything the visitor must act on.

4. LAYOUT

- One idea per band down a single scrolling page, with scrollspy replacing a site map.
- Product grids reflow from four columns to one; photographs never crop faces or corners of a card.

5. COMPONENTS

- Mega-menu — category columns on desktop, accordion on mobile.
- Product card — image, name, one line of material detail.
- Lightbox — keyboard dismissible, focus returned on close.
- Testimonial carousel — auto-advancing, pausing on hover or focus.
- Enquiry form — inline validation, one clear submit.
- Stat counters — animating once on first view, static thereafter.
